PROMISE LEDGER DEMO CONTRACT

Acme Master Services Agreement

Fictional agreement prepared for the neatHack 2026 Promise Ledger demonstration.

Document	2026 Edition
Effective date	1 October 2026
Parties	Acme Operations GmbH and Tasklane Software Inc.
Classification	Synthetic demonstration data - not legally binding

This fictional Master Services Agreement defines the product, availability, and security commitments used in the Promise Ledger benchmark.

4.1 Business plan features

Tasklane will make SSO configuration available to administrators of every Business plan workspace.

6.2 Availability

Tasklane will maintain 99.9% monthly service availability. If availability falls below 99.9%, eligible customers may request service credits under the published service-level schedule.

8.1 Security controls

Tasklane will encrypt customer data at rest and require multi-factor authentication for administrative accounts.

10.4 Termination

On termination, Tasklane will return or delete customer content as required by the applicable data processing addendum.
